A MASSIVE (MUSIC) COLOURING BOOK
HELLO,

Colouring has been proven to do wonders for the mind. Just like music.

It helps us struggle with negative thoughts and habits by redirecting them into something positive. Plus, it’s fun. And not just for kids.

Grown-ups-who-never-want-to-grow-up might find themselves indulging in it too.

So, why not slow down for a second and carve out some me-time?

Put on some music, create your #minimasterpieces and share your artwork with us on Instagram (tag @massivemusic for a re-share).

PS. Colouring outside the lines is highly encouraged.

A special thank you to Raymond Burger and Leah Devine for the illustrations.

With love in the happiest chord progression ever,
Frank Zappa
